Open networking across the enterprise.

With a full lineup of open, standards-based switches and partnerships, Dell makes it easy to bring open networking to the data centre. Our new 1/10GbE and 10/40GbE open networking switches are purpose-built to accelerate applications and ensure flexibility with the choice of OS and software, making networks ready to adapt as workloads demand.

Low-latency performance

Accelerates VM migration, big data analytics and cloud applications with high-performance top-of-rack switches.

Flexibility for the future

Allows users to select a Dell or third-party OS and choose their SDN implementation – overlay, controller based or programmable.

Open networking freedom

Offers more agility, more choices and lower costs than proprietary networks with open networking solutions and proven global services and support.

Dell Networking S3048-ON

The Dell Networking S-Series S3048-ON 1000BASE-T Top-of-Rack (ToR) switch is purpose built for high performance, software defined data centres. It is the industry's first 1GbE Enterprise switching platform to deliver both an industry hardened OS and open networking flexibility to run 3rd party operating systems (OS), such as Cumulus Linux.

Dell Networking S4048-ON

The Dell Networking S4048-ON is a high-density, 1RU 48-port 10GbE top-of-rack switch with six 40GbE uplinks and ultra-low-latency to ensure line-rate performance, empowering organisations to deploy modern workloads and applications designed for the open networking era.

Dell Networking S6000-ON

The Dell Networking S6000-ON 10/40GbE top-of-rack (ToR) switch is purpose-built for applications in high-performance data centre and computing environments. The compact design provides industry-leading density of 32 ports of 40GbE or 96 ports of 10GbE and eight additional ports of 40GbE to conserve rack space while enabling denser footprints and simplifying migration to 40Gbps in the data centre core.

Dell ProSupport Plus

Gives the fast problem resolution and support needed to keep businesses running.

Dell PartnerAdvantage reward programme.

What is Dell PartnerAdvantage ?

PartnerAdvantage is exclusively for Dell Channel partners and as the name suggests has been introduced to give our partners additional advantage when selling Dell products and solutions.

Who can participate ?

General Managers, sales and technical pre-sales representatives from Dell Registered, Premier and Preferred Partners are eligible to register on the program.

Sell/Learn

Within each campaign, you will have the opportunity to earn Advantage Points. For this you need to acquire knowledge on Dell products by taking online courses and passing the corresponding exams and to claim the eligible products that you have sold. Each incentive campaign has a different technology focus ; your sales and training courses will determine your success on the campaign. New this quarter, some campaigns are rewarding you for your eligible sales made through distributors.

Earn great rewards

When you claim your sales and earn Advantage Points you can then exchange them for a reward of your choice from the extensive catalogue. There are hundreds of rewards available, giving you the choice of everything from once-in-a-lifetime rewards such as hot-air ballooning, Ferrari racing and white-water rafting to the latest audiovisual equipment and weekend breaks. It's up to you whether you redeem your Advantage Points as you earn them or save them up for that dream reward.

For more information, visit www.dellpartnerincentives.com.

PartnerDirect training.

- Dell provides partners with comprehensive training resources to help them build their business by developing and strengthening their knowledge and expertise.
- Partners have access to a variety of online and instructor-led training, ranging from partner certification to in-depth product, solutions and installation knowledge. Most training is in the form of online modules, which can be taken on-demand. This training is free of charge. For some technical instructor-led training, e.g. those leading to installation qualification, there may be a charge.
- Participating in our training programmes not only turns expertise into profit, but enables partners to earn PartnerAdvantage points on specific training and benefit from rebates for completed competencies.

Visit the Training and Competencies pages on PartnerDirect and explore:

Open networking across the enterprise.

With a full lineup of open, standards-based switches and partnerships, Dell makes it easy to bring open networking to the data centre. Our new 1/10GbE and 10/40GbE open networking switches are purpose-built to accelerate applications and ensure flexibility with the choice of OS and software, making networks ready to adapt as workloads demand.

Low-latency performance

Accelerates VM migration, big data analytics and cloud applications with high-performance top-of-rack switches.

Flexibility for the future

Allows users to select a Dell or third-party OS and choose their SDN implementation – overlay, controller based or programmable.

Open networking freedom

Offers more agility, more choices and lower costs than proprietary networks with open networking solutions and proven global services and support.

Dell Networking S3048-ON

The Dell Networking S-Series S3048-ON 1000BASE-T Top-of-Rack (ToR) switch is purpose built for high performance, software defined data centres. It is the industry's first 1GbE Enterprise switching platform to deliver both an industry hardened OS and open networking flexibility to run 3rd party operating systems (OS), such as Cumulus Linux.

Dell Networking S4048-ON

The Dell Networking S4048-ON is a high-density, 1RU 48-port 10GbE top-of-rack switch with six 40GbE uplinks and ultra-low-latency to ensure line-rate performance, empowering organisations to deploy modern workloads and applications designed for the open networking era.

Dell Networking S6000-ON

The Dell Networking S6000-ON 10/40GbE top-of-rack (ToR) switch is purpose-built for applications in high-performance data centre and computing environments. The compact design provides industry-leading density of 32 ports of 40GbE or 96 ports of 10GbE and eight additional ports of 40GbE to conserve rack space while enabling denser footprints and simplifying migration to 40Gbps in the data centre core.

Dell ProSupport Plus

Gives the fast problem resolution and support needed to keep businesses running.

PartnerAdvantage is exclusively for Dell Channel partners and as the name suggests has been introduced to give our partners additional advantage when selling Dell products and solutions.

Who can participate ?

General Managers, sales and technical pre-sales representatives from Dell Registered, Premier and Preferred Partners are eligible to register on the program.

Sell/Learn

Within each campaign, you will have the opportunity to earn Advantage Points. For this you need to acquire knowledge on Dell products by taking online courses and passing the corresponding exams and to claim the eligible products that you have sold. Each incentive campaign has a different technology focus ; your sales and training courses will determine your success on the campaign. New this quarter, some campaigns are rewarding you for your eligible sales made through distributors.

Earn great rewards

When you claim your sales and earn Advantage Points you can then exchange them for a reward of your choice from the extensive catalogue. There are hundreds of rewards available, giving you the choice of everything from once-in-a-lifetime rewards such as hot-air ballooning, Ferrari racing and white-water rafting to the latest audiovisual equipment and weekend breaks. It's up to you whether you redeem your Advantage Points as you earn them or save them up for that dream reward.

PartnerDirect training.

- Dell provides partners with comprehensive training resources to help them build their business by developing and strengthening their knowledge and expertise.
- Partners have access to a variety of online and instructor-led training, ranging from partner certification to in-depth product, solutions and installation knowledge. Most training is in the form of online modules, which can be taken on-demand. This training is free of charge. For some technical instructor-led training, e.g. those leading to installation qualification, there may be a charge.
- Participating in our training programmes not only turns expertise into profit, but enables partners to earn PartnerAdvantage points on specific training and benefit from rebates for completed competencies.

Visit the Training and Competencies pages on PartnerDirect and explore:

How to buy.

Ordering your Dell products and solutions is easy, whether it's directly through your Dell Account Manager or the Dell site, or via one of our distribution partners.

Distributors

Dell preferred distribution partners stock many of Dell's key product lines, priced competitively and available for next day delivery. You can find your nearest Dell distributor [here](#).

Online

Premier and Preferred Partners can buy products directly from Dell via Premier Pages:

- Log into Dell.co.uk/Premier
- Choose your configuration from the comparison grids of this catalogue by clicking on the product image.
- If you are signed into Premier you will go directly to the configuration page.

Phone

Premier and Preferred Partners can call their Dell Account Manager.

Solutions Configurator

Configure validated Dell enterprise solutions with over 400 products across servers, networking, storage, switches, rack infrastructure with list price. Easily collaborate with a sales rep to quickly obtain your price and quote. Go to Dell.co.uk/partner/SolutionsConfigurator.
